1 Committee/Subcommittee hearing bill: State Affairs Committee  
 2 Representative Goodson offered the following:

**Amendment**

Remove lines 57-112 and insert:

6 (a) "Beneficial use" means the use of fossil fuel  
 7 combustion products in building products, and as substitutes for  
 8 raw materials, necessary ingredients, or additives in products,  
 9 according to accepted industry practices, including the  
 10 following:

11 1. Asphalt, concrete or cement products, flowable fill,  
 12 and roller-compacted concrete.

13 2. Structural fill or pavement aggregate that meets the  
 14 following requirements:

15 a. The fossil fuel combustion product is not in contact  
 16 with groundwater, surface water bodies, or wetlands and is not  
 17 placed within 100 feet of a potable well that is being used or  
 18 might be used for human or livestock water consumption; and

19 b. The placement of the fossil fuel combustion product

Amendment No. 1

20 does not extend beyond the outside edge of the structure or  
21 pavement. Placement of the structure or pavement must be  
22 completed as soon as practicable after placement of the fossil  
23 fuel combustion product.

24 3. Use of flue-gas emission control materials which meet  
25 the definition of gypsum and are used in accordance with  
26 applicable Florida Department of Agriculture and Consumer  
27 Services rules.

28 4. Waste stabilization, or initial or intermediate cover  
29 material used for lined Class I or III landfills, provided that  
30 the material meets applicable department rules for landfill  
31 cover or a landfill's permit conditions for cover.

32 5. Any other use that meets the criteria of s.  
33 403.7045(1)(f) or that is approved by the department prior to  
34 use as having an equivalent or reduced potential for  
35 environmental impacts, when used in equivalent quantities,  
36 compared to the substituted raw products or materials.

37 (b) "Fossil fuel combustion products" means fly ash,  
38 bottom ash, boiler slag, flue-gas emission control materials,  
39 and other non-hazardous materials, such as gasifier slag,  
40 fluidized-bed combustion system products, and similar combustion  
41 materials produced from the operation of a fossil fuel-fired  
42 electric or steam generation facility, from a clean coal or  
43 other innovative technology process at a fossil fuel-fired  
44 electric or steam generation facility, or from any combination  
45 thereof.

46 (c) "Fossil fuel-fired electric or steam generation  
47 facility" means any electric or steam generation facility that

Amendment No. 1

48 is fueled with coal, alone or in combination with petroleum  
49 coke, oil, coal gas, natural gas, other fossil fuels, or  
50 alternative fuels.

51 (d) "Pavement aggregate" means fossil fuel combustion  
52 products used as sub-base material under a paved road, sidewalk,  
53 walkway, or parking lot as a substitute for conventional  
54 aggregate, raw material, or soil.

55 (e) "Structural fill" means the use of a fossil fuel  
56 combustion product as a substitute for a conventional aggregate,  
57 raw material, or soil under an industrial or commercial building  
58 or structure. Structural fill does not include uses of fossil  
59 fuel combustion products that involve general filling or grading  
60 operations or valley fills.
